

Bring your SAP transformation to life with Lemongrass and Google Cloud

Google Cloud offers an optimized experience for SAP on the cloud

Innovation

Google Cloud's leading AI and ML capabilities make it simple to derive business insights from your SAP data.

Reduced risk

Google Cloud's agile infrastructure decreases downtime and virtually eliminates productive outages.

Simplified deployment

Google Cloud makes deployment easy with migration incentives and automated deployment templates.

Sustainability

Google Cloud is the industry's cleanest cloud, with net-zero operation emissions.

Lemongrass delivers a superior managed services experience

Cutting-edge automation

Lemongrass Cloud Platform (LCP) is purpose built to modernize and automate SAP systems on cloud. Our platform unlocks innovation and agility for your business by establishing operational excellence, reducing both planned and unplanned downtime, and driving the DevOps cycle more quickly and efficiently.

Unmatched SAP expertise

Lemongrass has one of the largest dedicated SAP on cloud teams in the world, with more than 750 partner certifications. As your expert partner, we make it simple to get the guidance you need.

Innovative strategy

Lemongrass delivers the services you need to plan, migrate, operate, and innovate on Google Cloud. We also work with you to proactively provide new ideas and recommendations to continue delivering value to your business for years to come.
