

Shed Technical Debt and Keep Your Edge with SAP BTP

You May Already Be Missing Out

Understanding how to effectively establish a BTP environment and unlock its full potential can be overwhelming, making it challenging to identify clear, actionable value for the organization.

But, by not leveraging SAP BTP's extensive service portfolio, you risk:

- High operational costs and capital expenditures due to delays
- Falling behind competitors who adopt agile practices
- Missed growth opportunities by not scaling effectively
- Accumulation of technical debt leading to regrettable investments that must eventually be replaced.

Why SAP Customers Choose Lemongrass

Proven Expertise: A pioneer in SAP BTP with a strong record of successful implementations.

SAP Recognized Partner: Trusted SAP specialist with extensive BTP implementation experience.

End-to-End Service: Comprehensive implementation planning, execution, and ongoing managed services.

Benefits of the BTP Starter Pack

- Ensures seamless integration and efficient use of BTP capabilities.
- Includes provisioning and configuration of SAP Cloud Connector, CIS and relevant BTP services (e.g., Integration Suite, Build Process Automation).
- Aligns components to your production and non-production environments.
- Optimizes system connectivity, enhances security, and streamlines operations.
- Provides well-documented setup and knowledge transfer to accelerate user adoption and digital transformation.

Lemongrass Services

At Lemongrass, we specialize in establishing SAP BTP environments, ensuring best-practices, governance, secure connectivity, and enabling key services like Integration Suite, Datasphere, SAC, and much more.

Our Five Step approach for a seamless migration includes:

- **Environment Setup:** Ensure BTP setup has been completed, and self-assessment has been executed.
- **Assessment & POC:** Review self-assessment, complete a POC for several integrations.
- **Migration:** Migrate the remaining interfaces to BTP Integration Suite.
- **Production Cutover:** Execute cutover for production interfaces
- **Hypercare Support:** Monitor post-Go-Live performance and handover to BAU services

Don't wait. You can implement SAP BTP aligned with your current environment and business needs, and realize its benefits now.
